

General Mental Health Apps

What's Up

What's up is an amazing free app that uses Cognitive Behavioral Therapy (CBT) and Acceptance Commitment Therapy (ACT) methods to help you cope with Depression, Anxiety, Stress, and more. Use the positive and negative habit tracker to maintain your good habits, and break those that are counterproductive. In the "Get Grounded" page, you will find over 100 different questions to pinpoint what you're feeling, and the "Thinking Patterns" page, which teaches you how to stop negative internal monologues.

Mind Shift

Mind Shift is one of the best mental health apps designed specifically for teens and young adults with anxiety. Rather than trying to avoid anxious feelings, Mind Shift stresses the importance of changing how you think about anxiety. Think of this app as the cheerleader in your pocket, encouraging you to take charge of your life, ride out intense emotions, and face challenging situations.

Self-Help for Anxiety Management (SAM)

SAM might be perfect for you if you're interested in self-help, but meditation isn't your thing. Users are prompted to build their own 24-hour anxiety toolkit that allows you to track anxious thoughts and behavior over time, and learn 25 different self-help techniques. You can also use SAM's "Social Cloud" feature to confidentially connect with other users in an online community for additional support.

Happify

Need a happy fix? With its psychologist-approved mood-training program, the Happify app is your fast-track to a good mood. Try various engaging games, activity suggestions, gratitude prompts and more to train your brain as if it were a muscle, to overcome negative thoughts.

Breathe2Relax

Sometimes you just need to breathe and remind yourself you are okay. Breathe2Relax is made for just that. Created by the National Center for Telehealth and Technology, this app is a portable stress management tool that teaches users a skill called diaphragmatic breathing. Breathe2Relax works by decreasing the body's 'fight-or-flight' stress response.

Headspace: Meditation & Sleep

The Headspace app makes meditation simple. Learn the skills of mindfulness and meditation by using this app for just a few minutes per day. You gain access to hundreds of meditations on everything from stress and anxiety to sleep and focus. The app also has a handy "get some headspace" reminder to encourage you to keep practicing each day.

Calm – Meditate, Sleep, Relax

Calm provides people experiencing stress and anxiety with guided meditations, sleep stories, breathing programs, and relaxing music. This app is truly universal; whether you've never tried meditation before or regularly practice, you'll find the perfect program for you.

Moodfit

Tools and insight to shape up your mood. This app helps you reduce the symptoms of stress, anxiety and depression.
