

Year 2 Home Learning Project

Due in Monday 11th December 2023

Dear Year 2 children,

This half term in Science and English, we are learning about 'Animals including Humans' and how to look after a pet. For your Home Learning Project, we would like you to create an information book about an animal, which can be **kept as a pet** in the UK. Some possible animals could be; a dog, a cat, a hamster or a rabbit. You may write an information booklet about your pet at home if you have one.

You can choose to create your information book by hand or on a computer, however you must include the following features within your book:

- Title page (front cover)
- Contents page
- What is the name of your animal?
- What does it look like?
- Where in the UK could the animal be found? (England, Scotland, Wales, Northern Ireland)
- What is its habitat? (a woodland, a pond, a forest etc)
- What is its diet? (What does it eat?)
- Some fun facts about your animal
- Photos or pictures

The books which are presented to a high standard and include factual information will be displayed in our class reading corner!

We can't wait to read your information books!
