

## Year 2 Home Learning Project

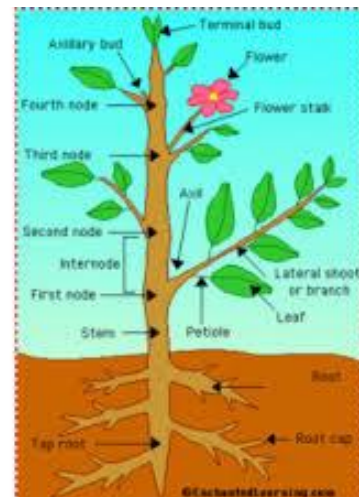

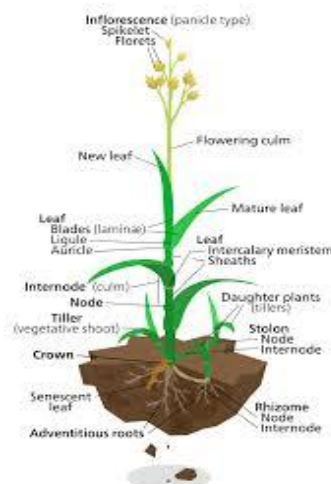

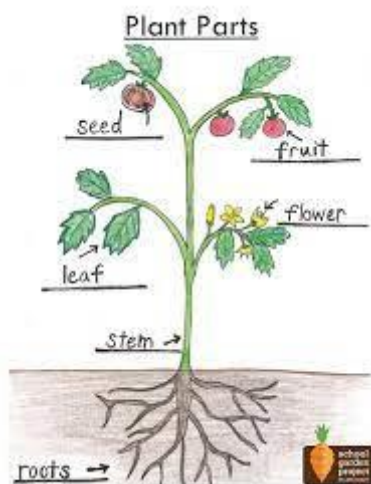

Due in Monday 12<sup>th</sup> February 2024

This half term in science, we will be learning about plants and their functions in our world.

For your project, we would like you to create a model diagram of a plant. Your project must show clear labelling of each part of the plant with its name and a brief description of how it supports a plant's development, you could choose to talk about a flowering plant or a fruit plant.

You must also use a range of different medium to create an artistic approach to your diagram. For example, you could use paint, crayons, collage, papier mâché or drawing.

Here are some examples to help get you started:

We cannot wait to see all of your fabulous projects.

The Year 2 Team
