

Science - Plants

We are going to be growing plants as part of our Science this term. Could you gather bulbs or seeds and grow these in the ground or pot? Sunflowers or daffodils would work this time of year. Take pictures of your plant's progress.

English - Mystery Stories

In English, we will be looking at mystery stories.

Choose your favourite mystery book and write a book review about it. Tell us what made the mystery interesting!

Programming B Actions and Events

We will be recapping programming using the software Scratch. We will create a maze and move sprites through the maze adding obstacles along the way. Can you draw a maze to direct someone through the streets of Rome?

French – Animals

This term, we will be learning about animals in French.

Can you pick your favourite animal and describe what it looks like in French? Think about the facial features, colours and body parts of the animal.

Geography – Comparing Rome and London

We are going to be exploring the similarities and differences between Rome and London.

Can you research what it is like to live in Rome and what kind of activities you can do there?

Then, create a poster to get people to visit Rome on holiday.

Year 3

Home Learning Project Summer 1

Mystery Stories, Plants, Photo Frames, Programming Events and Actions and Comparing Cities

DT – Photo Frames

In DT, we are going to be creating our own photo frames using wood! Wood is a very strong material and is used to make many objects in your home. Research why wood is a good material to use for an object and draw an idea of what your photo frame could look like.
